4th Gen Intel® Xeon® Scalable is here and with it the biggest computational performance jump in recent years. This stacked SKU range contains a brand-new set of workstation CPUs that are set to replace the dated X299 HEDT architecture.

The first overclockable workstation parts from Intel since 2019, the Intel® Xeon® W-2400 series - codenamed 'Sapphire Rapids', or 'SPR' - promises incredible IPC and a range of new optimizations.

Our G3 SPR-M server is the ultimate mid-core-count, high-speed system. With our tuned Intel® Xeon® w7-2495x boasting 4.8GHz across all cores and 45MB of cache running at 3.2 GHz.

- Quad Channel DDR5 ECC RDIMM
- True IPMI Management Solution
- Redfish Support
